Lab 2: Agile Product Backlog & Epics Specification

Agile Requirements Transformation, User Story Mapping & Fibonacci Estimation

Student Name: Pranav
SRN: PES1UG24CS466
Problem Statement #35: Customizable Subscription Box Scheduler
Domain: Retail, E-Commerce & Finance
Jira Workspace: sripranavbuduguru.atlassian.net
Project Key: SCRUM

1. Overview & Agile Transformation Methodology

In this lab, the functional requirements identified during Lab 1 for the *Customizable Subscription Box Scheduler* were transformed into Agile Epics and prioritized User Stories. Estimation was performed using the **Fibonacci sequence (1, 2, 3, 5, 8...)** via collaborative **Planning Poker** conventions, reflecting implementation complexity, technical uncertainty, and end-user business value.

2. Agile Epics & User Stories Catalog

Epic / Issue Key	User Story Title	Agile User Story Format (As a... I want... So that...)	Points	Priority	Lab 1 Trace
Epic 1: Subscription Box Customization Personalization & Swapping	**SCRUM-8** Manage Preference Tags	**As a** subscriber, **I want to** set and update preference tags (e.g., "vegan", "dark roast"), **so that** my monthly box curates items matching my taste.	5 SP	HIGH	FR-002
	SCRUM-9 Swap Box Items	**As a** subscriber, **I want to** swap individual monthly box items up to 48 hours before renewal, **so that** I receive exactly the products I desire.	5 SP	HIGH	FR-001
Epic 2: Subscription Cycle Management Schedule & Billing Controls	**SCRUM-10** Pause Delivery	**As a** subscriber, **I want to** pause recurring shipments for up to 3 months before renewal, **so that** I am not billed or sent boxes while traveling.	5 SP	HIGH	FR-001
	SCRUM-11 Skip Billing Cycle	**As a** subscriber, **I want to** skip an upcoming monthly billing cycle with auto-resumption next month, **so that** I don't need to permanently cancel.	3 SP	MEDIUM	FR-003
Epic 3: Fulfillment & Renewal Management Operations & Notifications	**SCRUM-12** View Fulfillment Manifest	**As a** fulfillment lead, **I want to** view and filter monthly box orders by category and destination, **so that** packing and inventory allocation are organized.	5 SP	HIGH	FR-004
	SCRUM-13 Export Fulfillment Manifest	**As a** fulfillment lead, **I want to** export shipping labels for 10,000 boxes in under 1 minute, **so that** automated warehouse packing has no delay.	5 SP	HIGH	FR-004, NFR-001
	SCRUM-14 Renewal Reminder Notifications	**As a** subscriber, **I want to** receive automated reminder alerts 72 hours prior to renewal date, **so that** I have sufficient time to customize, pause, or skip.	3 SP	MEDIUM	FR-005

Planning Poker Estimation Summary: Total Product Backlog Effort = **31 Story Points**. Sprint 1 was allocated **18 Story Points** (SCRUM-8, SCRUM-9, SCRUM-10, SCRUM-11) focusing on subscriber personalization and lifecycle self-service. Sprint 2 was

allocated **13 Story Points** (SCRUM-12, SCRUM-13, SCRUM-14) focusing on warehouse fulfillment operations and automated notification services.

3. Jira Epics, User Stories & Story Points Evidence

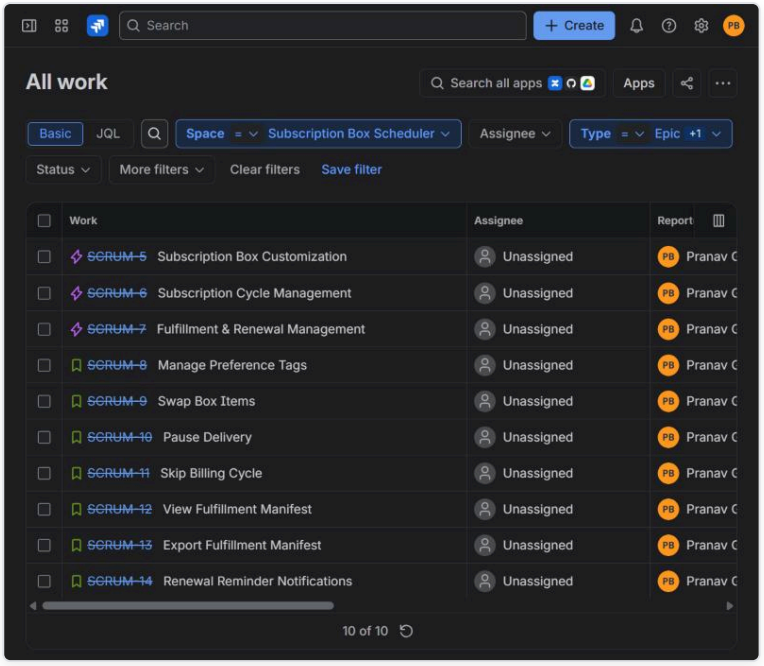

Figure 1: Jira work item search for project SCRUM showing the 3 Epics (SCRUM-5 to 7) and 7 User Stories (SCRUM-8 to 14). Both sprints are complete, so the stories no longer appear on the Backlog page.

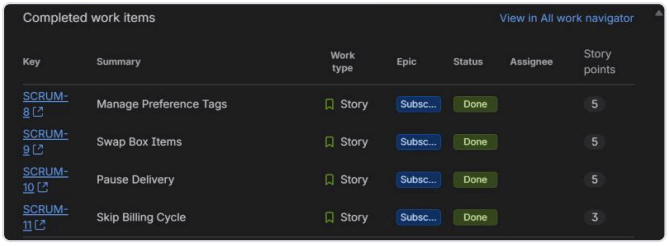

Figure 2: Story points assigned to the Sprint 1 stories (18 SP), from Jira's Sprint 1 report.

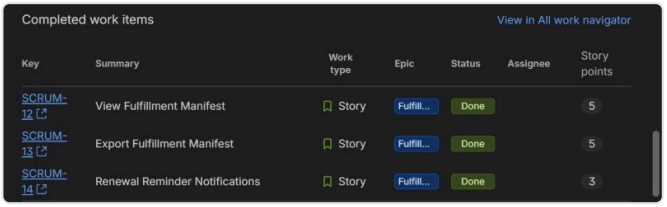

Figure 3: Story points assigned to the Sprint 2 stories (13 SP), from Jira's Sprint 2 report.
